### PROFESSIONAL SUMMARY

A creative and driven front-end developer with a passion for producing clean, interactive, client-side applications. Determined to face any problem head-on in order to develop effective solutions that engage and excite the user. Interested in pursuing opportunities that create innovative and captivating user-experiences.

**Available for full-time positions starting May 2021**

### EXPERIENCE

#### Software Engineer Intern

Constant Contact | Waltham, MA / Remote | June 2020 - Aug. 2020

Collaborated with teammates on the Front-End Kits Team to build out view-layer components to be used throughout the organization using React, HTML/JSX, and CSS/SCSS.

#### Enterprise Technology Development Intern

MassMutual | Springfield, MA | May 2019 - Aug. 2019

Created a user-friendly experience on MassMutual's Finance Data and Analytics Portal using HTML, CSS, TypeScript, Angular, and Node.js.

### PROJECTS

#### 2018 U.S. Hate Crimes Data Visualization

Rochester Institute of Technology | 3 Weeks

- Developed an interactive data visualization that represents the reported hate crimes per state in the U.S. in 2018.
- Utilized the D3.js library, along with HTML and CSS, to create interactive bar charts and nested donut charts for this data

#### bookWatch

Rochester Institute of Technology | 1 month

- Passed and fetched API book and movie data so the application can give movie suggestions based on book choices
- Used Vue.js to create book search methods that display book info fetched from the APIs
- Developed Vue-Template components with an ES6 class to store movie data
- Created a word cloud visualization of data pulled from Firebase using Vue.js and DOM manipulation

### SKILLS & TOOLS

**Development:** JavaScript (ES6, React, Angular, Vue), HTML, CSS/SCSS, Protractor Testing, TypeScript, Node.js, D3.js, Java, C#, Swift, Bootstrap, jQuery, Git, Unity, XCode, VS/VSCode

**Design:** Adobe Illustrator, Adobe Photoshop, Adobe InDesign, Figma
